14 If this passes and Yucca Mountain actually  
15 does come into being, I will be moving out of the  
16 state. I will be taking my kids with me. I would  
17 highly encourage anyone to leave. There is no way they  
18 could ever convince me that they could do this safely.  
19 They're saying that those receptacles are good for  
20 10,000 years. They have no way of proving that. We've  
21 been lied to in the past. I'm not going to fall for  
22 it. I think it's a shame that Nevada, if it happens,  
23 would sit still and let it happen. Every state should  
24 be responsible for their own waste. That's it.
